Dear Ben,
I love this story in "I believe in you and
Parker

$$E(r) = r_f + \beta_i \left[\frac{\sigma_m}{\sigma_i} \right]$$

Higher the β more sensitive stock is to market movements, measures sensitivity to market risk factors.

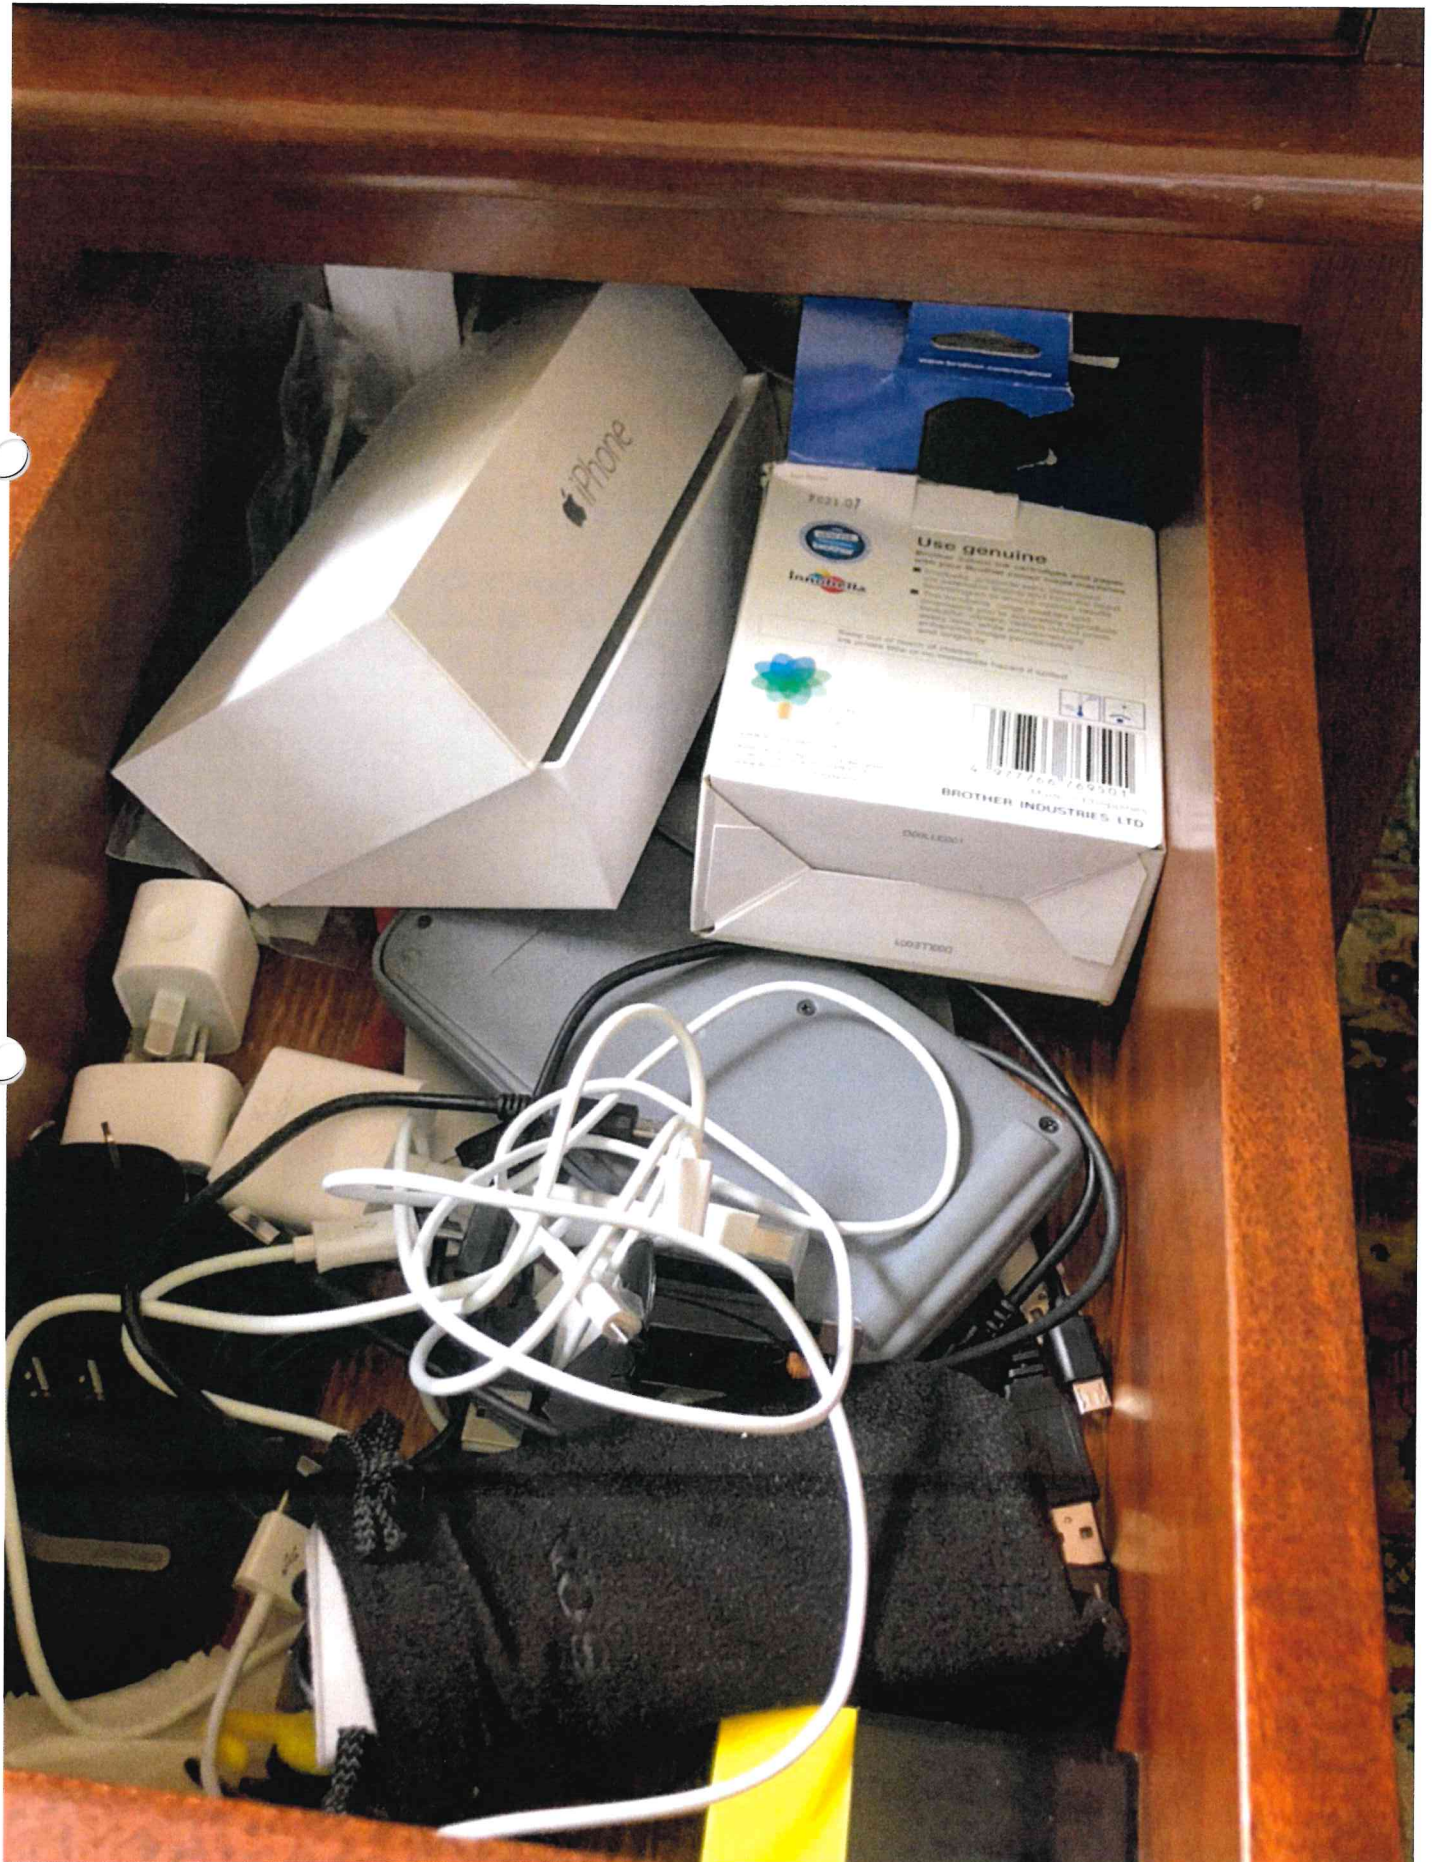

Find β with correlation: $\beta_A = \frac{\rho_{A,m} \sigma_A}{\sigma_m}$
Find $\beta_p = w_1 \beta_1 + w_2 \beta_2$
